

# How to change the file **Owner** in google drive?

1. Right-click on the file or folder and select **Share**.

2. Under **Sharing settings**, click on Editor icon, then change the permission to **Make Owner**.

The screenshot displays the 'Share with people and groups' interface in OneDrive. It lists four users: 'khawla Abdulrazig (you)' (Owner), 'Heba Alaroshe' (Editor), 'Pharm D' (Editor), and 'salma bukhatwa' (Editor). A dropdown menu is open for 'Pharm D', showing options: 'Viewer', 'Editor' (selected with a blue checkmark), 'Give temporary access' (Comment and view only), 'Make owner' (highlighted with a red box), and 'Remove'. Below the list is a 'Get link' section with a 'Restricted' link that only people added can open, with a button to 'Change link to Libyan International Medical university'.
