# Political Dimension

By: Abdurrahman El Fituri

# Political Dimension

Political dimension is known as the use of internet for the distribution of information, by bringing the government's political agenda closer to citizens and the appliance of bias-free policies or fair policies.

In addition the political dimension is in any social or cultural organization, from the smallest interaction for example between two people to a whole country

# The benefits of Political Dimension

- Expansion of trade, industrialization, finance and GDP
- Expansion of Diplomacy and “Soft Power” as the core of state power
- Expansion of International Law and Organizations
- Expansion of Freedom, Democracy, Civil Society
- Expansion of Development and Foreign Assistance
- Expansion of Western Culture and Values
- US a principal beneficiary of Globalization
- Empowerment of individuals, women, groups, minorities

# Political globalization

It refers to the strengthening and expansion of political ties between all countries or regions, allowing governments to have more opportunities to participate and exert their influences in the decision making of international affairs.

# Political Dimension of Society

- The political dimension of culture and society is all about power. Whereas politics and political science include discussions about other things, such as political ideologies, the political dimension of society is limited to power, and leaves ideology to the values dimension of culture.
